

ABSTRACT OF THE DISCLOSURE

A system for aligning a trailer hitch of a towing vehicle with a corresponding socket on a trailer includes:

- (a) a trailer vertical rod assembly mountable on the trailer, the trailer vertical rod assembly including a vertically extendible rod;
- (b) a stop mountable on the trailer hitch;
- (c) a rear mirror line tab attachable to a rear view mirror of the towing vehicle; and
- (d) a rear window line tab attachable to a rear window of the towing vehicle.
